

THE hotel kart race  
**IPSAL CUP 2007**

**SUBJECT: 1<sup>St</sup> of November 2007. TIME PERFORMANCE**

Dear friends,

Time is passing very fast... and we know that most of you are extensively training in Radotin for this exclusive event.

In order to help you understand the race and to improve your performance please find hereafter the analysis of last years' race based on the final of the IPSAL CUP 2006

- 1) Driving range: On this graph you will see the Maxima and Minima lap time per hotel. It gives you an idea of the team strength.
- 2) Moving average: On this graph you will see the position of the hotel as well as its lap time. It is a good indication on the strategy used by the captain ie: When to release fast drivers.

I would like to confirm that we were obliged to close the registration because we reached a record of 24 hotels; **120 drivers !!!**

**Because of this high number of participants we really would like to see you on the training date 22 or 23 October 2007. Your received a date by mail, please do not miss the training day because this will disqualify your team.**

Good luck and see you soon...

**IPSAL TEAM**
